SUMMARY

Software Engineering student with hands-on experience in TypeScript, React, Node.js, Java and Spring Boot, REST APIs, CLIs and third-party service integrations. I gained it through personal projects and as the lead developer of a SaaS CRM in production. Self-taught, good at solving practical problems and quick to pick up new technologies. Seeking my first software engineering internship.

EDUCATION

FIAP | São Paulo, SP Jan 2026 – Dez 2029
Bachelor's Degree in Software Engineering

PROFESSIONAL EXPERIENCE

SympleCRM · Fullstack & AI Developer · *Technical Co-founder* · 2026 - Present

- Built a full-stack SaaS CRM with a sales pipeline, authentication and a PostgreSQL architecture using Row-Level Security.
- Implemented two-way WhatsApp integration (n8n + Evolution API), real-time sync and AI automations (Groq/OpenAI) for lead pre-qualification, auto-replies and voice message transcription.
- Served as lead developer and co-owner and took the platform to production, including onboarding with chat history import, follow-up automations and separate development and production environments.

Stack: React 19, TypeScript, TanStack Start, Supabase, PostgreSQL, Cloudflare Workers, n8n, Evolution API, OpenAI/Groq.

PERSONAL AND ACADEMIC PROJECTS

Helix - Google maps prospecting CRM - TypeScript + Next.js + Sqlite - [GitHub](#) | [Live](#)

- Prospecting CRM that finds businesses without a website on Google Maps, ranks by digital presence, and tracks outreach through a custom pipeline.
- Multi-user with Better Auth and row-level multi-tenant isolation in the data layer, enforced by types and covered by cross-account tests on every data route.
- Deployed on Railway with GitHub Actions CI, a health check, and daily backups.

CalorieTracker - Nutrition tracker application - Java + Spring Boot + PostgreSQL + Next.js - [GitHub](#) | [Live](#)

- Full-stack nutrition tracking app with JWT authentication (BCrypt), meal, macro and water logging, and periodic summaries.
- FatSecret API integration through a Cloudflare Worker that acts as an OAuth2 proxy. Two-level caching (Caffeine in-memory + PostgreSQL table) keeps external calls to a minimum.
- 152 automated tests (JUnit 5, Mockito, MockWebServer) with ~95% coverage measured by JaCoCo.

Study App - VIVO Mobile x FIAP - TypeScript + React - [GitHub](#)

- Top 10 out of 120+ teams in the FIAP x VIVO Mobile academic Challenge, solving a real problem the company presented.
- Uses generative AI (Gemini) to turn photos of class notes into summaries, exercises, tests and study plans for exams.

SKILLS

Programming Languages: TypeScript, JavaScript, Java

Back-end: Node.js, Spring Boot

Front-end: React, Next.js, Tailwind CSS, Bootstrap

Databases: PostgreSQL, MongoDB, Prisma ORM, Supabase

Tools & DevOps: Git & GitHub, Docker, n8n, Cloudflare, Railway

LANGUAGES

Portuguese: Native

Inglês: advanced - FCE B2 First, Cambridge Assessment English (2024)
